

Individual attention

Complimentary one-on-one training session.

Each OrCam MyEye device is hand-delivered by a certified OrCam Trainer™ who will teach you how to use your new device. It arrives at your doorstep complete with all accessories included. We believe in providing an exceptional experience.

OrCam enhances quality of life

“I can get a quick view of the newspaper without all of the strain. I read my email from my smartphone on the go. With the OrCam MyEye device you really get more out of life - I feel less dependent and more relaxed”

– Moshe F, Legally blind from childhood.

“Sitting at a restaurant with a friend and using the OrCam MyEye device meant that we didn’t have to focus on my disability because I was able to read the menu on my own”

– Debbie S, Recent rapid deterioration of vision.

“The OrCam MyEye device’s intuitive point and speak functionality makes it easy for anyone to quickly learn how to use”

– Bryan Wolynski, O.D., F.A.A.O.

What is OrCam MyEye?

OrCam MyEye is an intuitive wearable device with a smart camera designed to assist people who are blind or visually impaired.

OrCam gives independence.

Easy to Use

All you have to do is point.

OrCam MyEye responds to simple gestures making it easy to use - whether it's to read, find an item or recognize a face or product. No need to search for audio books, learn new software or use other tools.

Read

OrCam MyEye can read printed text, in real time.

You can read newspapers and books, signs, labels on consumer products and even text on a computer or smartphone screen. Perfect for use at home and on the go.

Recognize people

OrCam MyEye recognizes known faces.

No more guessing - previously stored faces are recognized and announced upon entering the camera's view. Less awkward situations, more control of your environment.

Identify your personal items

Personalize your OrCam MyEye device by teaching it to identify specific products around you.

Identify previously entered consumer products, money notes and credit cards to make shopping and browsing quicker and easier.

All that with just the point of a finger!
